Dear Commissioner Doll and Director Hajec,

I am writing to both of you because of the serious flaws with the prosecution of my patent application (Application No.: 10/604469) by Ted Stigell and Nich Luchessi. I have communicated mainly with Ted Stigell over the prosecution of the patent which amazingly is going on its 8<sup>th</sup> year. I tried leaving multiple messages in the past with Mr. Luchessi but never received a response, so there is zero use in trying to contact him. My application is currently in the appeals process. Mr. Stigell, in the only attempt he has made to speed the process, called a phone number which I have never provided in any communication and stated in the record that he made an attempt to call me at a phone number which is not even mine. I have given my number to Director Hajec who had successfully called me back; I remember being in the hospital seeing a patient, so it can be done; I have spoken to Mr. Stigell on my cell phone as well, with him initiating the call in 2006, so I do not know why he has chosen to state in the record that he tried to call me on a phone number which is not even the one he has successfully called before, and that I have never provided in any communication. This is typical of this botched effort and it is serious. I will be calling again now to your offices to get this matter finally resolved.

Sincerely,

*Iftikhar Khan MD, FACEP*
